

Senior Research Instrumentation Specialist

Job Description

The Senior Research Instrumentation Specialist, under direction, oversees the daily operation of equipment support services including the design, fabrication, maintenance, calibration, operation and adjustments of scientific instruments. Supervises assigned staff.

Responsibilities:

- Oversees the daily operation of equipment support services including the design, fabrication, maintenance, calibration, operation and adjustments of scientific instruments.
- Provides highly specialized technical skills in the repair, modification and operation of electronic and mechanical equipment, scientific instruments, instructional and research equipment.
- Advises faculty and staff regarding operation, and maintenance of scientific instrumentation.
- Oversees purchasing and billing for instrumentation resources and services.
- Responsible for inventory control of parts and supplies.
- Trains departmental personnel in the use of all instrumentation and related software.

Required Education:

Bachelor's degree or any equivalent combination of training and experience.

Required Experience:

Eight years in repairing, operating, and maintaining scientific instrumentation, to include some supervisory experience.

Knowledge, Skills and Abilities:

- Knowledge of word processing, spreadsheet, and database applications.
- Oral and written communication skills.
- Ability to multitask and work cooperatively with others.
